## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 36 and 37 are rejected under 35 U.S.C. 102(b) as being anticipated by US 3,757,816 to Price.

Price discloses a downhole tool and method of using the same, shown in Fig. 1, which comprises a valve arrangement 10 for restricting fluid flow through the central bore. The valve arrangement further includes flow ports 12 for fluid communication between the central bore and the surrounding annulus. The step of actuating the valve arrangement and varying the configuration of the restriction is anticipated by the col. 4, lines 28-47, and changes in the valve plug position due to the venturi effect due to well fluid flow through the ports 12.

- The flow restriction is anticipated by the annular tapered seat 14 and a corresponding axial movement of the tapered plug or plunger which create flow restriction therethrough.
- The actuating force and the flow rated configuration is anticipated by col. 4, lines 28+, where the venturi effect created an actuating force to close the valve arrangement shown in Fig. 2.
